

Template Week 7 – Host your website on GitHub

Student number: 581429

Domain name (URL) of your website on GitHub:

<https://debil-ultra.github.io/581429/>

Relevant screenshots + motivation:

The screenshot shows the GitHub repository settings page for the repository 'debil-ultra'. The 'Pages' tab is selected in the sidebar. The main area displays the GitHub Pages configuration. It shows that the site is live at <https://debil-ultra.github.io/581429/>, last deployed 2 minutes ago. The publishing source is set to 'main' branch. There are sections for 'Build and deployment' (Source: Deploy from a branch, Branch: main), 'Custom domain' (Custom domains allow you to serve your site from a domain other than debil-ultra.github.io), and 'Enforce HTTPS'. The sidebar also includes sections for General, Access, Collaborators, Moderation options, Code and automation (Branches, Tags, Rules, Actions, Models, Webhooks, Copilot, Environments, Codespaces), Security (Advanced Security, Deploy keys, Secrets and variables), and Integrations.

Ready? Save this file and export it as a pdf file with the name: [week7.pdf](#)
